

LOKESHKUMAR D

.NET Core Developer | ASP.NET Core, Web API & SQL Server | Enterprise Application Development

Chennai, India | +91 90874 57182 | lokeshkumardhanapalan@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven .NET Core Developer with 4+ years of experience designing and building enterprise web applications using ASP.NET Core, MVC, Web API, C#, and SQL Server for internal, mission-critical business systems. Automated manual financial and operational workflows, cutting processing time by up to 50% for systems used by up to 100+ internal users across a pan-India rollout. Delivered secure, production-grade REST APIs (including AES-GCM encrypted platforms) end-to-end — from requirement analysis through UAT and production deployment — and improved application performance by up to 40% through query tuning and stored-procedure optimization. Comfortable owning full lifecycle delivery with high independence, having concurrently built and supported multiple production systems within a lean 2-engineer team. Strong foundation in SOLID principles, OOP, and 3-Tier Architecture, with hands-on use of AI-assisted development tools (GitHub Copilot, ChatGPT) to accelerate delivery without compromising code quality.

TECHNICAL SKILLS

Languages & Frameworks: C#, ASP.NET Core Web API, ASP.NET Core MVC, ASP.NET, ADO.NET, Entity Framework Core, JavaScript, HTML5, CSS3

Front-End: JavaScript, jQuery, Bootstrap, JQGrid, Materialize, Ajax Control Toolkit, HTML5, CSS3

Database: SQL Server 2008–2022, T-SQL, Stored Procedures, Views, Triggers

Tools & Platforms: Visual Studio 2022, Postman, Swagger, SSMS, IIS, Git, Serilog

AI-Assisted Development: GitHub Copilot, ChatGPT

Architecture & Practices: 3-Tier Architecture, MVC, SOLID Principles, OOP, RESTful API Design, Agile/Scrum

PROFESSIONAL EXPERIENCE

Associate Software Engineer — .NET Core Developer — Inspirisys Solutions Ltd, Chennai, India *Oct 2021 – Present*

- Designed and developed 5+ enterprise web applications using ASP.NET Core, ADO.NET, and SQL Server, supporting core finance and operations workflows for internal business units across the organization.
- Progressively took on greater ownership across the SDLC — requirement analysis, technical design discussions with business stakeholders, and effort estimation — while continuing to deliver hands-on development.
- Independently designed, built, and supported multiple production systems (Capex/Revex, Credit Note Automation, Margin Summary) concurrently within a lean 2-engineer team, coordinating priorities across overlapping release timelines without missing deadlines.
- Automated manual approval and financial workflows, reducing manual processing time by up to 50% for internal systems used by up to 100+ users across a pan-India, multi-region rollout.
- Engineered secure, AES-GCM encrypted API integrations with cross-platform (Python ↔ C#) compatibility and role-based access control, safeguarding sensitive financial data across production systems.
- Tuned SQL Server stored procedures and query execution plans, improving application performance by up to 40% and reducing average response times on high-traffic modules.
- Implemented structured, client-based logging using Serilog to improve production issue diagnosis and reduce mean time to resolution.
- Managed full application lifecycle — Development, UAT, and Production deployment on IIS — coordinating with legacy systems for zero-downtime releases.

KEY PROJECTS

All projects below are internal enterprise systems built for Inspirisys business units, delivered within lean engineering teams (2-7 engineers depending on project scope).

Secure Integration Platform (WeCare API)

2026 – Present

- Developed a secure ASP.NET Core 8 API using AES-GCM encryption for sensitive data transmission and multi-client authentication, ensuring cross-platform (Python ↔ C#) encryption compatibility.

- Implemented structured, client-based logging with Serilog and deployed to IIS alongside legacy systems, owning the release lifecycle from development through production.

Tech Stack: .NET 8, C#, SQL Server, ADO.NET, Serilog, IIS, REST API, AES-GCM, JavaScript, HTML, CSS

Capex/Revex Management System

2024 – 2026

- Built a multi-tiered capital/revenue expenditure approval platform used by ~40 internal finance users, with full audit trails and real-time visibility, replacing a manual, spreadsheet-based approval process and cutting approval processing time by ~50%.
- Designed grid-based data views with JQGrid for high-volume expenditure records, improving data review speed for finance approvers.

Tech Stack: .NET 8 (VS2022), ADO.NET, C#, SQL Server 2022, jQuery, JQGrid, JavaScript, HTML, CSS

Timesheet System

2023 – 2024

- Delivered an employee task-tracking and approval system with real-time reporting, improving resource-utilization visibility for project managers.

Tech Stack: ASP.NET (VS2022), jQuery, JQGrid, JavaScript, HTML, CSS, ADO.NET, C#, SQL Server 2022

Credit Note Automation System

2023 – Present

- Automated the credit note approval workflow for ~40 internal users with role-based access control, improving compliance and cutting manual processing effort by ~50%.

Tech Stack: ASP.NET (VS2019), jQuery, JQGrid, HTML, JavaScript, CSS, ADO.NET, C#, SQL Server 2022

Margin Summary Automation System

2021 – 2024

- Built a financial automation system for cost estimation and cash-flow management, scaled to 100+ users across a pan-India, multi-region rollout, streamlining multi-step approval workflows.

Tech Stack: ASP.NET (VS2019), jQuery, JQGrid, HTML, JavaScript, CSS, ADO.NET, C#, SQL Server 2017

CERTIFICATIONS

Certification in ASP.NET MVC using .NET Core (.NET 8) — Udemy

Credential: www.udemy.com/certificate/UC-76cd8640-adea-426f-98dc-3aa41f650489

EDUCATION

Bachelor of Computer Applications (BCA)

Sudharsan College of Arts and Science, Bharathidasan University, Tamil Nadu — Graduated 2021

CGPA- 7.9

LANGUAGES

English (Fluent), Tamil (Native)
